FOREWORD

The Global Standard for Connection:
For more than two decades, the Bluetooth member community has been proving the value of wireless connectivity. From wireless audio and wearable devices to location services and automation solutions, Bluetooth member companies continue to meet the needs of new consumer, commercial, and industrial markets.

Bluetooth Technology Overview:
Bluetooth® technology supports multiple radio options that enable developers to build products meeting the unique connectivity requirements of their products and solutions.

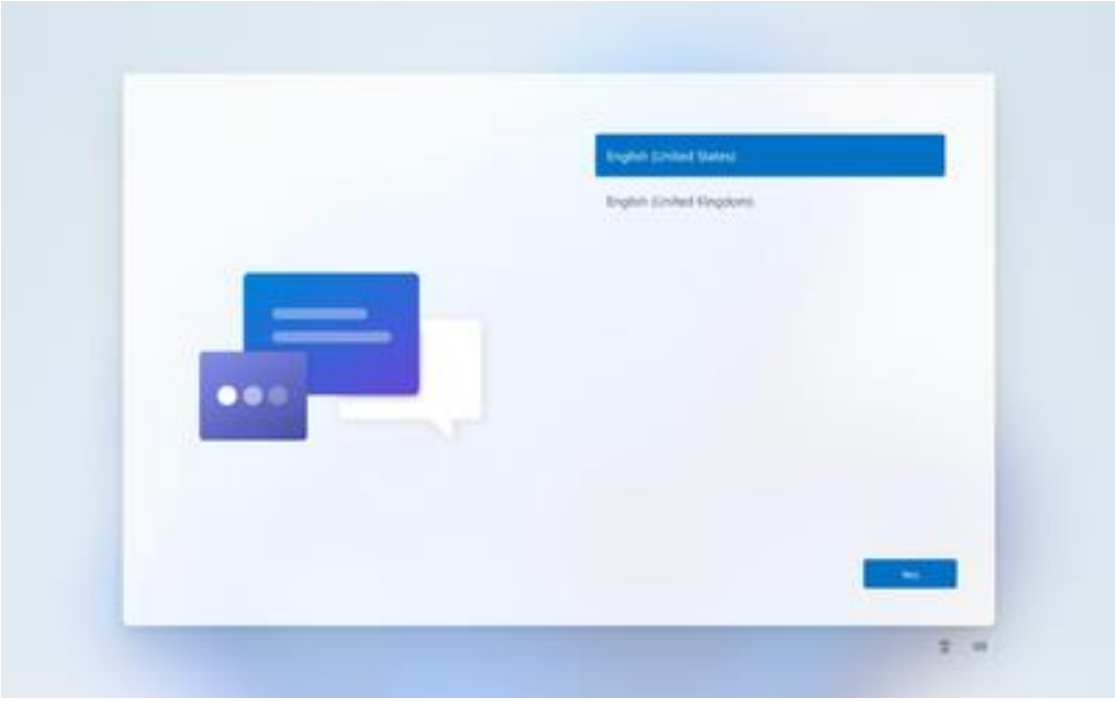

Please learn more here: https://www.bluetooth.com/learn-about-bluetooth/

Ready? Let's begin!

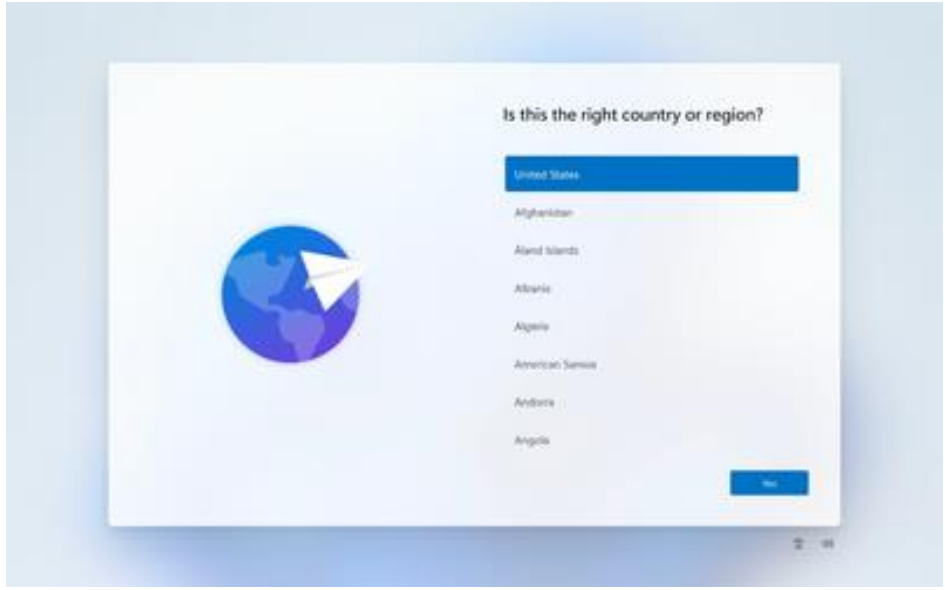

To set up a Windows OS, follow these steps:

Step 1: Select the language for your device.

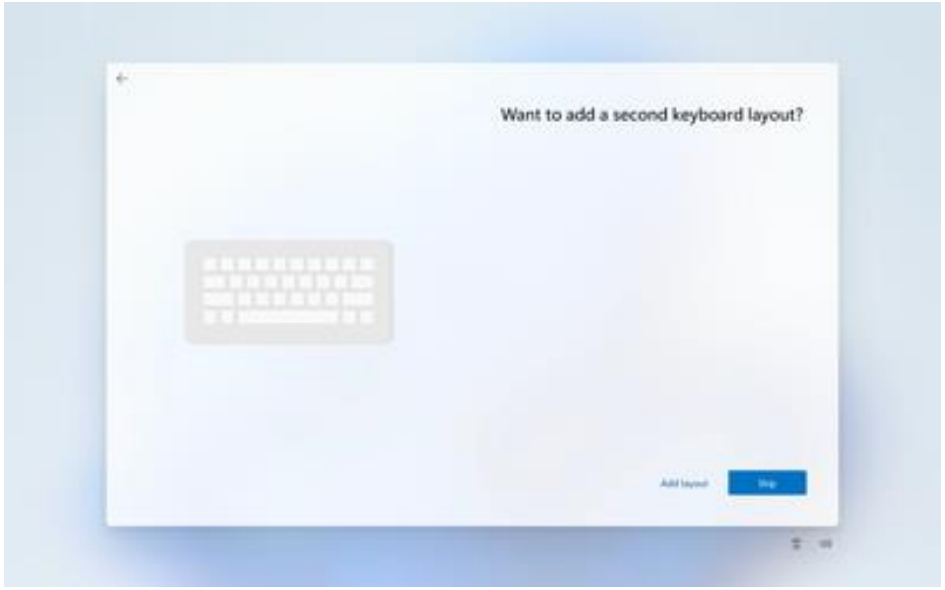

Step 2:

Select your country or region.

Step 3:

Select the Language for your device.

Step 4.

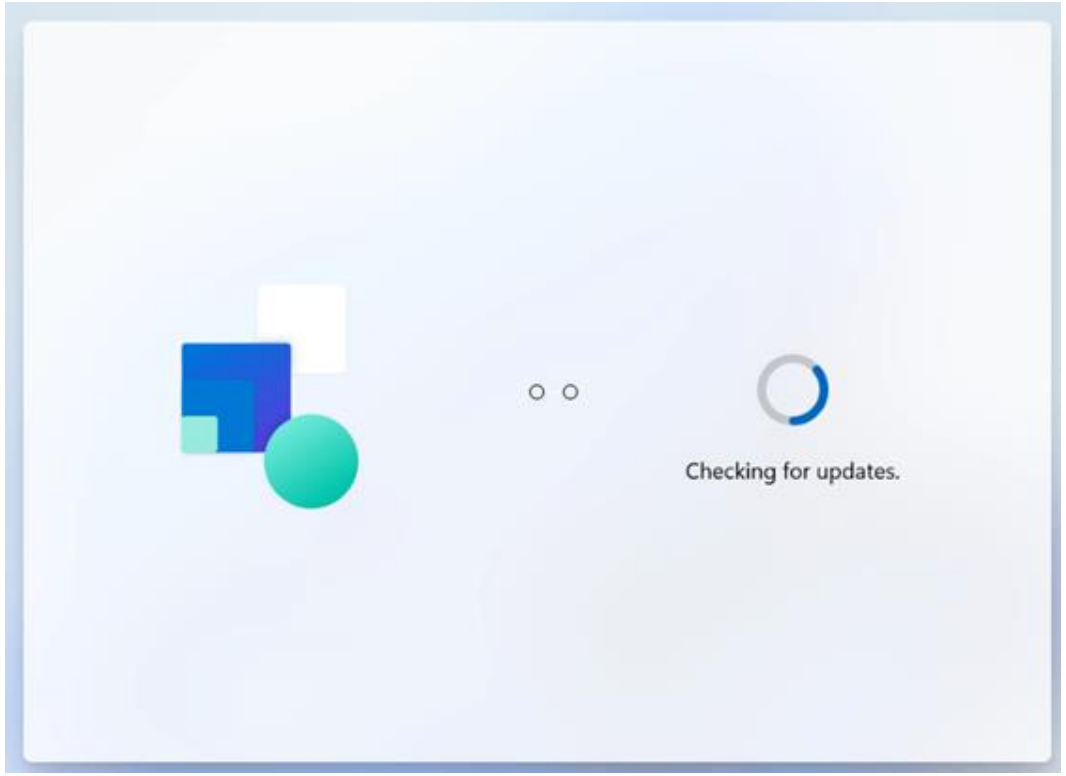

Connect your device to your household or office Wi-Fi by choosing the network name from the list. Click Connect and enter the password.

* If your laptop is connected to the wired internet, you may not see this screen.

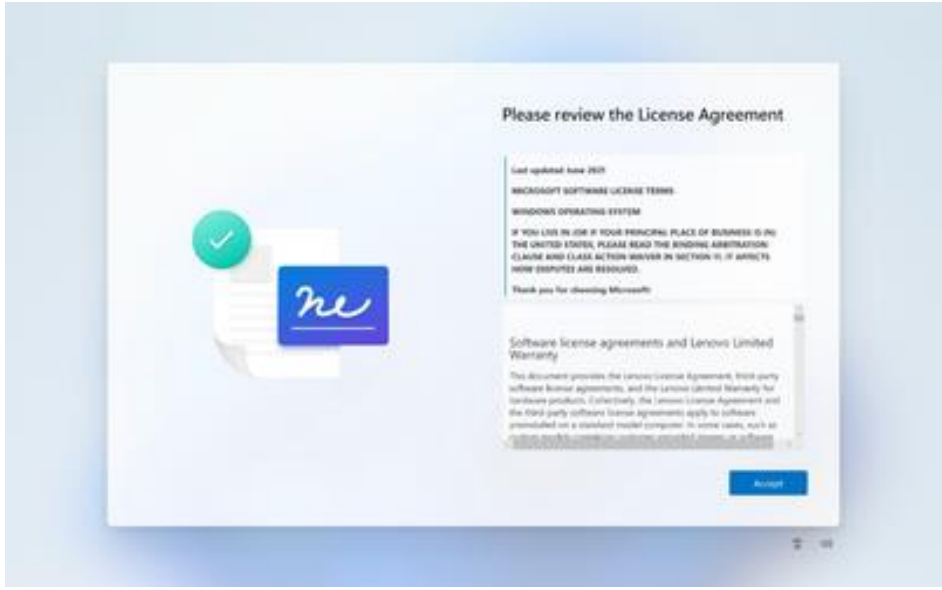

Step 5:

You will see the “checking for updates screen.” Wait until it finishes.

Step 6:

Please review and accept the License Agreement.

Step 7.

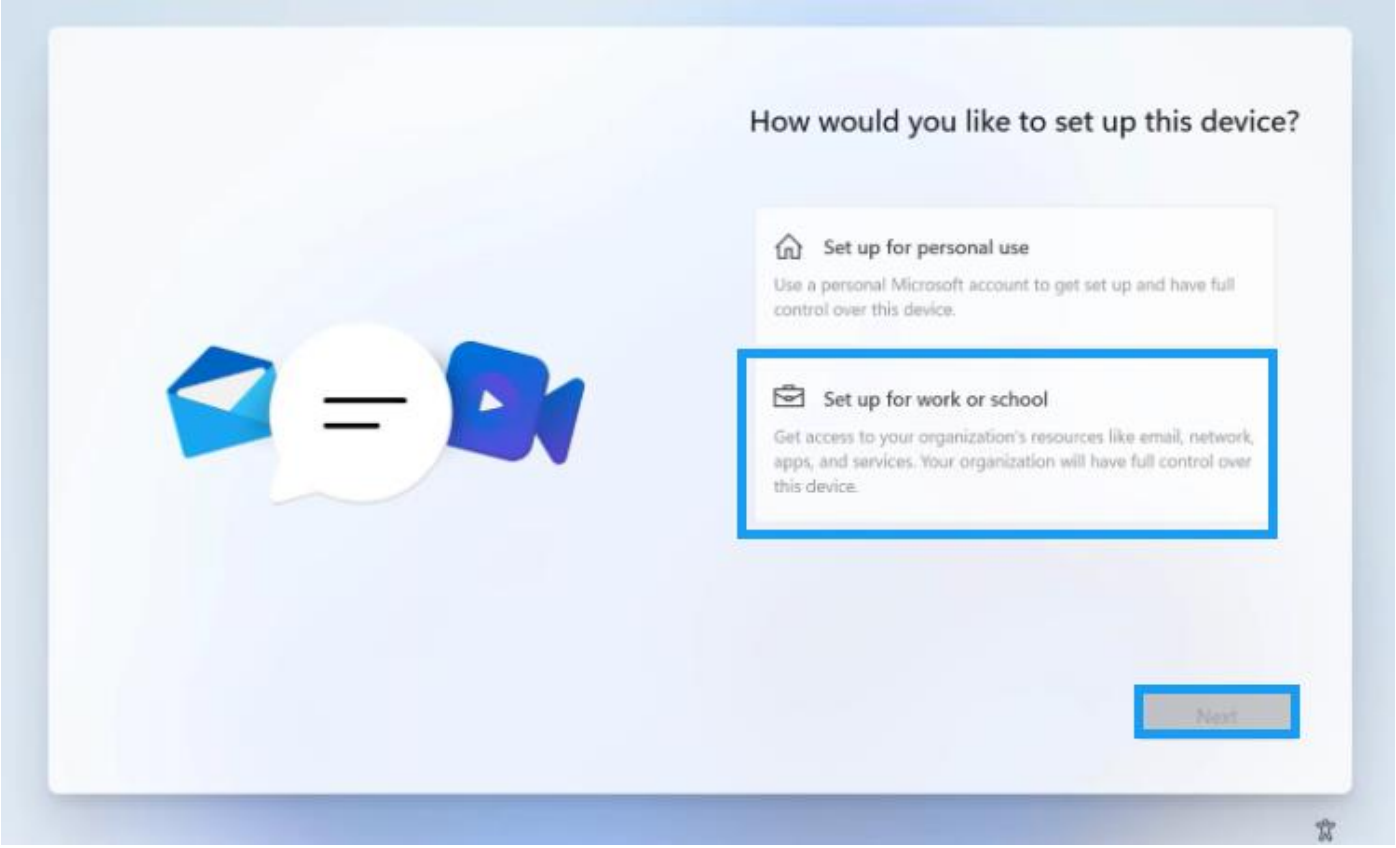

You will be asked to name your device. Please name your device in this format: **SIG-<Laptop Serial Number>.**
Example: **SIG-PF4xxxxx**

* How do I find my serial number? You can find your serial number on your Laptop box or in the welcome email.

Step 8.

When prompted with ‘How would you like to set up this device?’ select ‘Set up for work or school.’

Microsoft Authenticator.

You must have completed the Microsoft Authenticator setup on your mobile device to continue the setup.

If you have not completed the Microsoft Authenticator setup, please go to this **URL** to complete the setup.

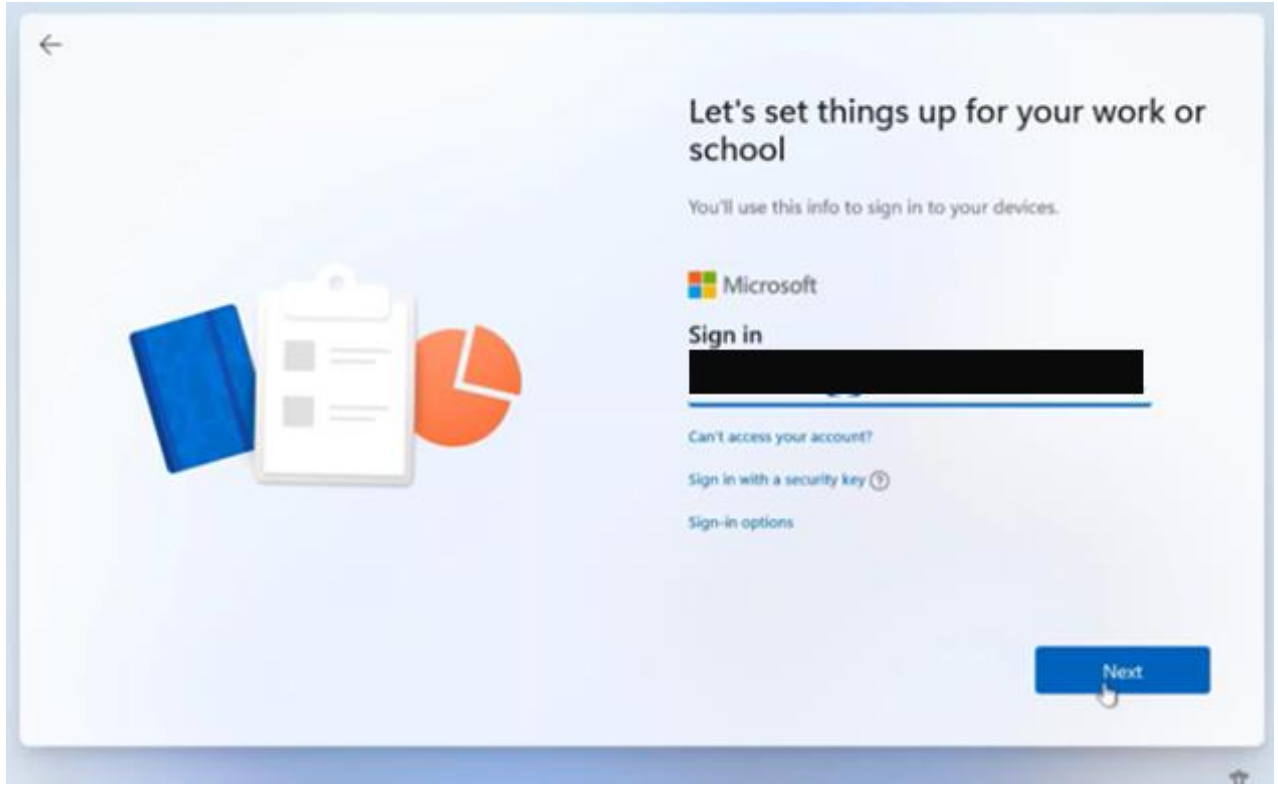

Please open the document in the App (Adobe.PDF)

Step 9.

When you are on this screen to set up a work or school account, select the **Sign-in option**. Log in with your @bluetooth.com email address and password.

It's essential that you **DO NOT** sign in using a Microsoft account, such as totowolff@hotmail.com, but instead use your Bluetooth, SIG-provided email address - @bluetooth.com. Please refer to your welcome email to see your @bluetooth.com email address.

After you enter your password, you will get the Microsoft Authenticator notification on your mobile device.

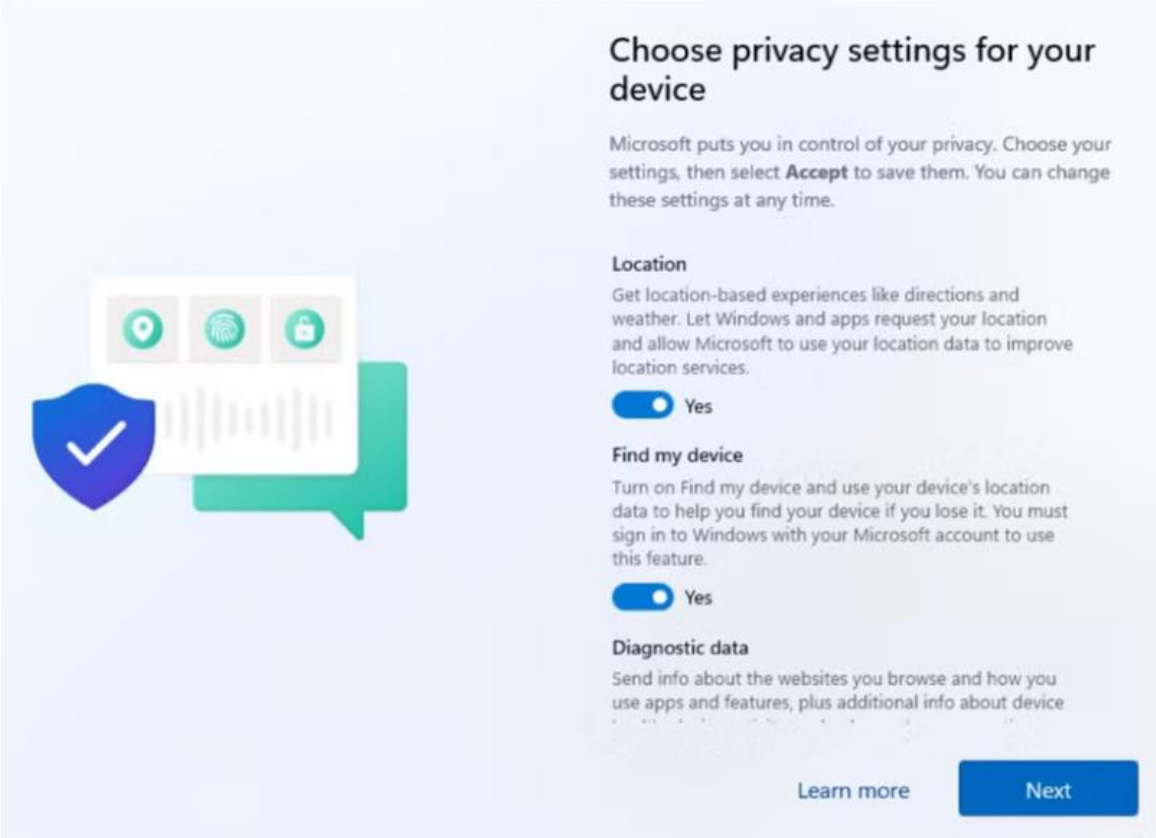

Step 10.

Choose privacy settings for your device.

Please **check the Location and Find My Devices boxes**, uncheck the other boxes, and click Accept. You may have to scroll down for more.

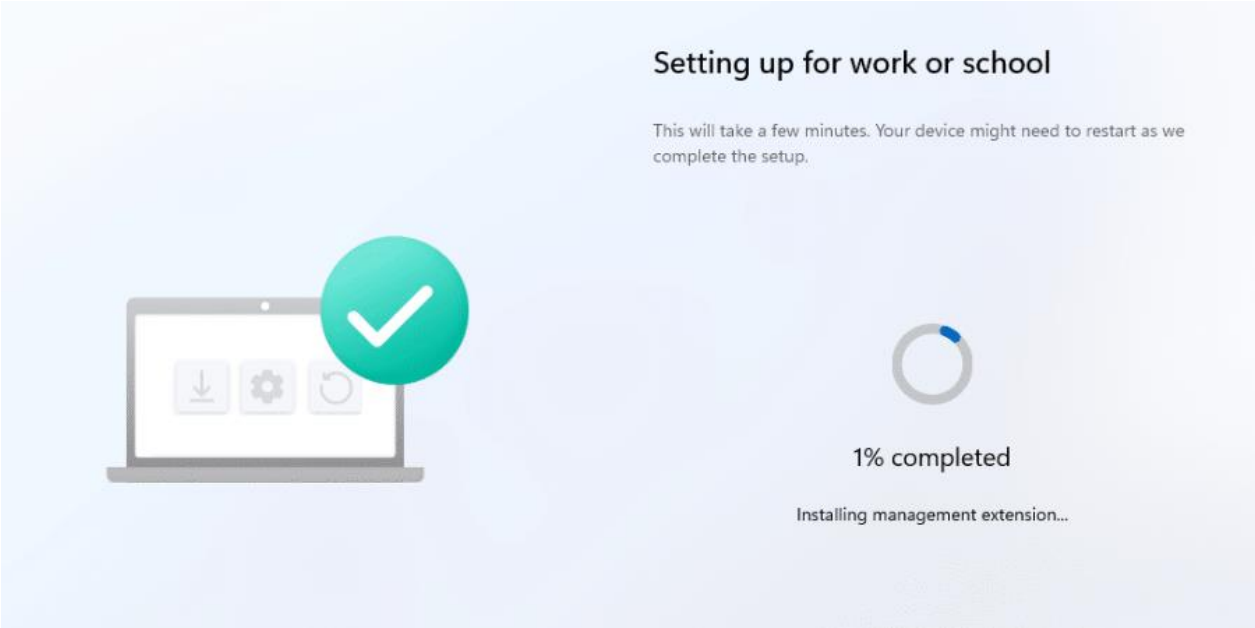

Protect your device: DO NOT type anything, click on **SKIP.**

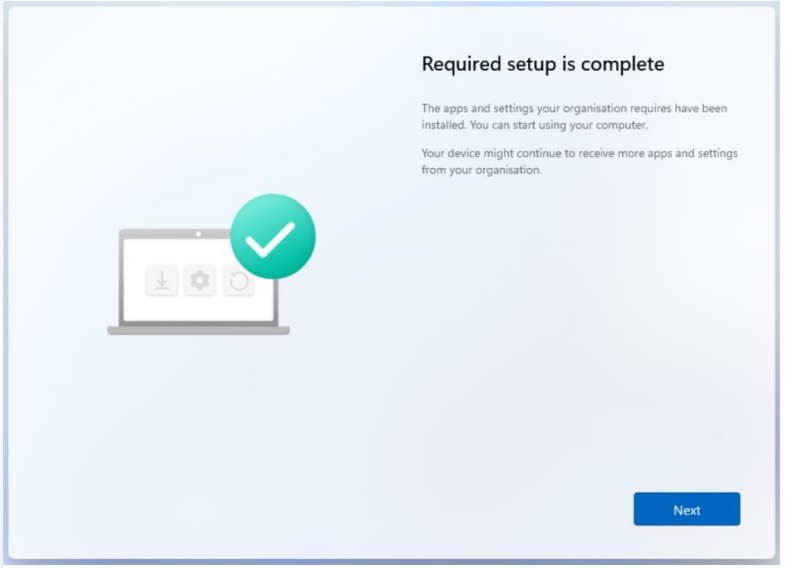

Step 10.

You will see the enrollment process.

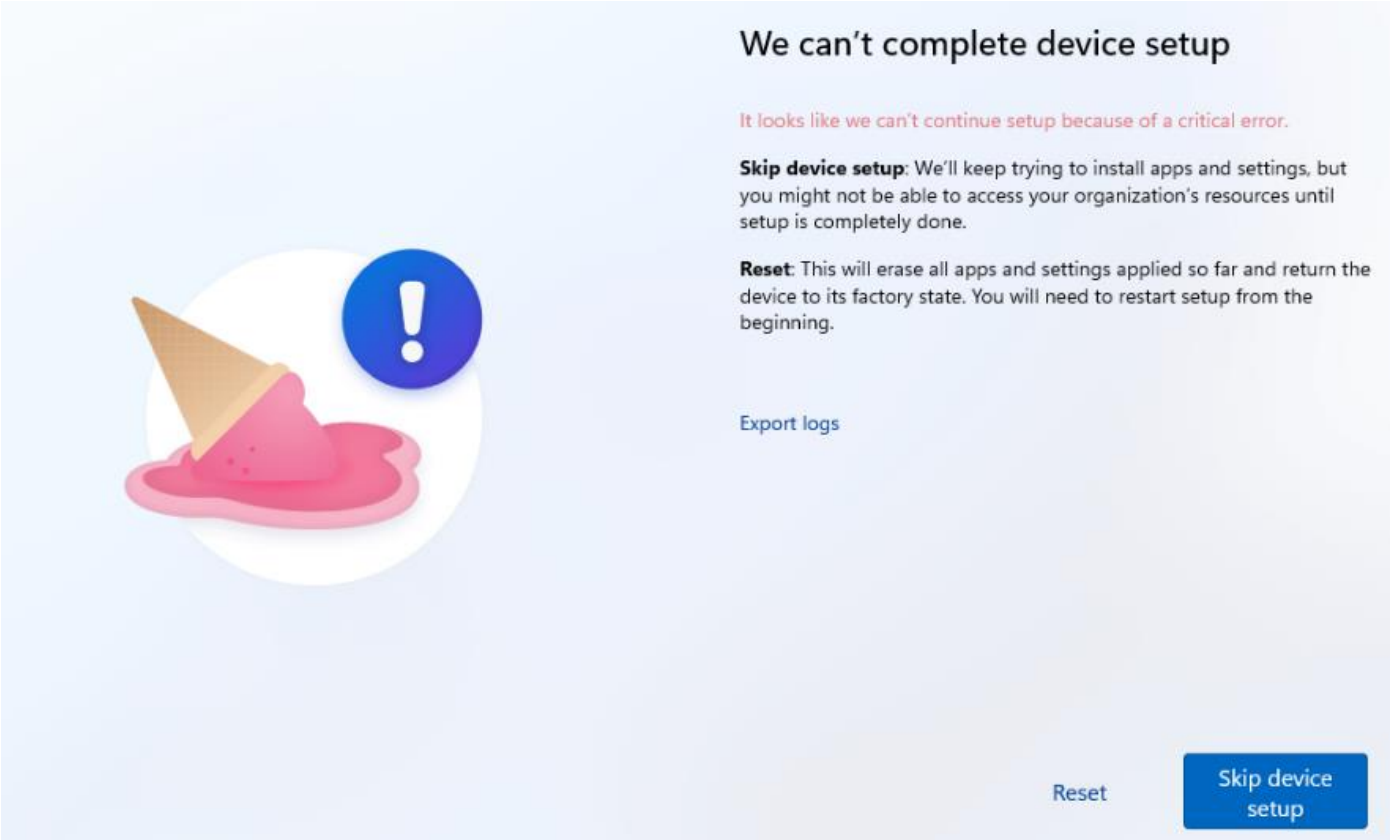

Note: It may take up to 30 minutes to complete. Once it`s completed, you will be taken to the Windows 11 desktop screen.

Step 11.

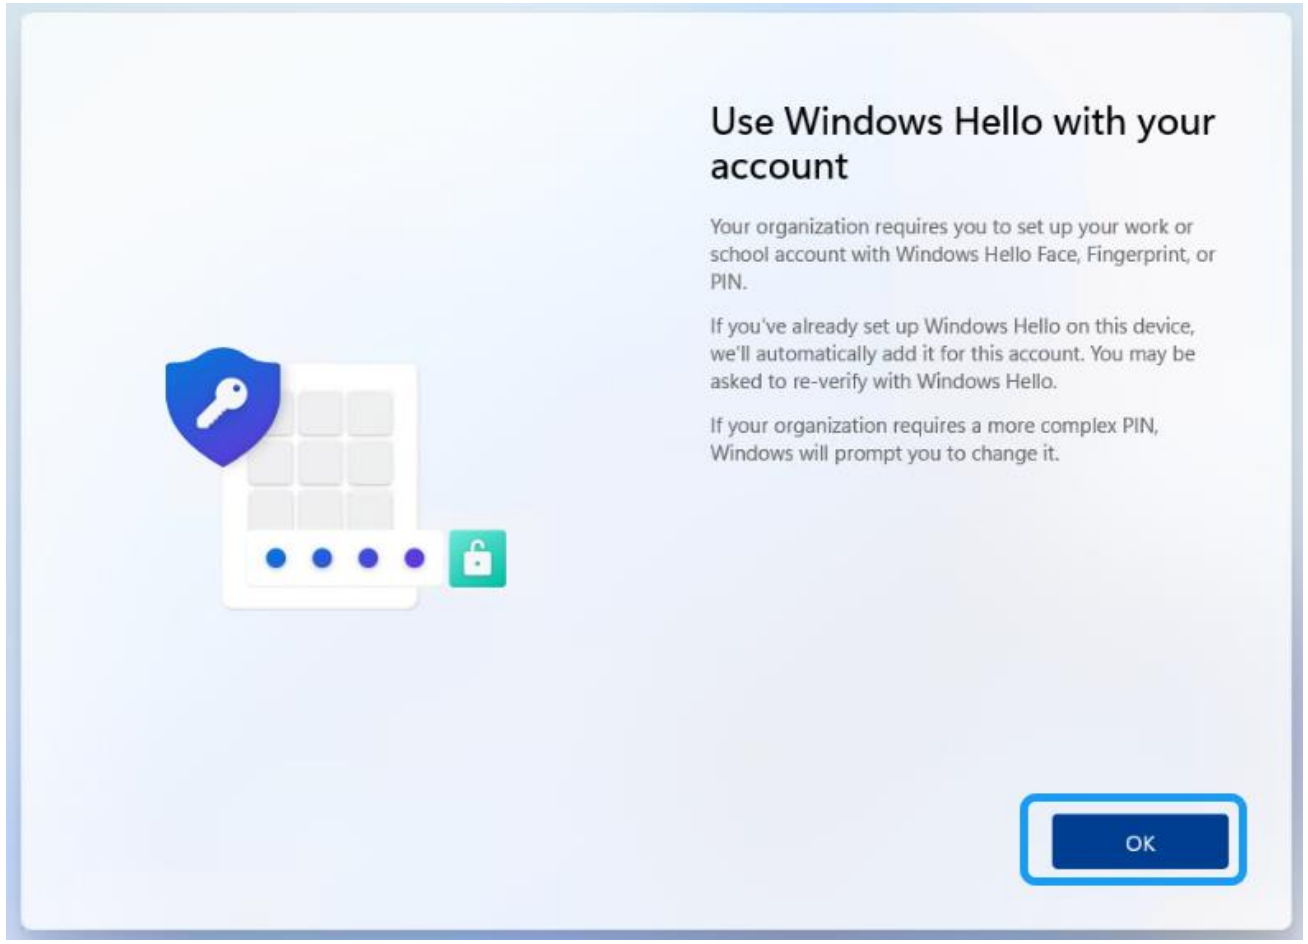

If you see this page, please contact ithelpdesk@bluetooth.com via email.

Windows Hello Setup.

If you want to use your face for faster and more secure sign-ins, you can choose to complete this optional step. Alternatively, you may skip this step, but you **must set up a PIN** on the next screen before you can successfully set up Windows Hello.

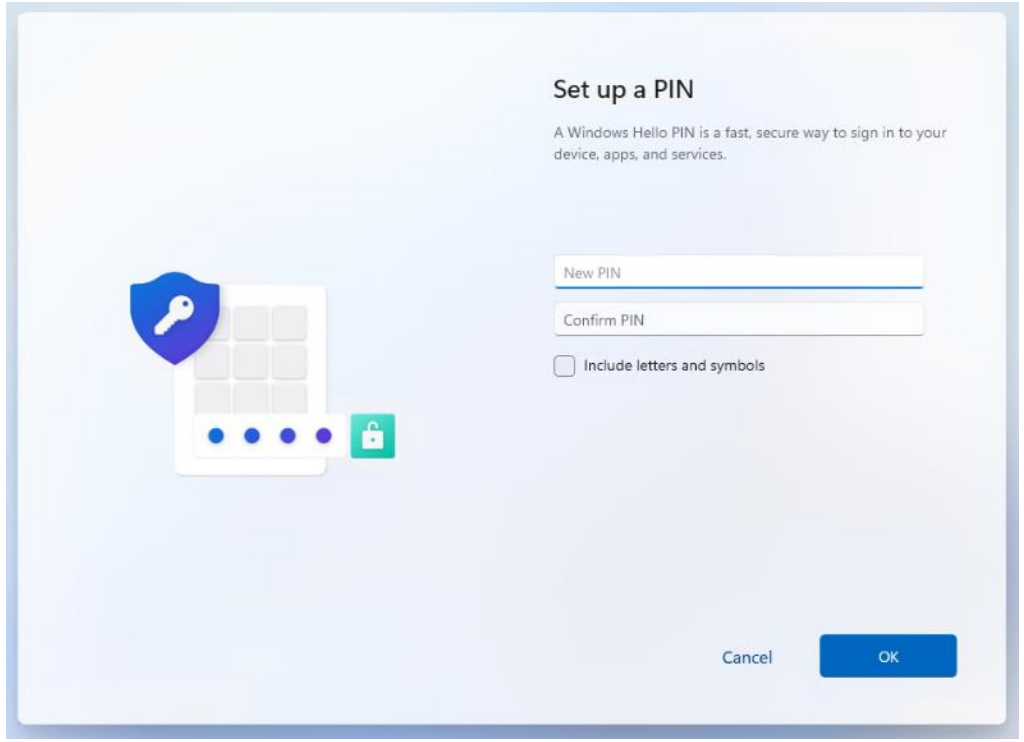

If you Skip the next screen, click ok

Windows Hello Setup Cont..

After completing the Microsoft Authenticator, you must create a **SIX (6) digits PIN.**

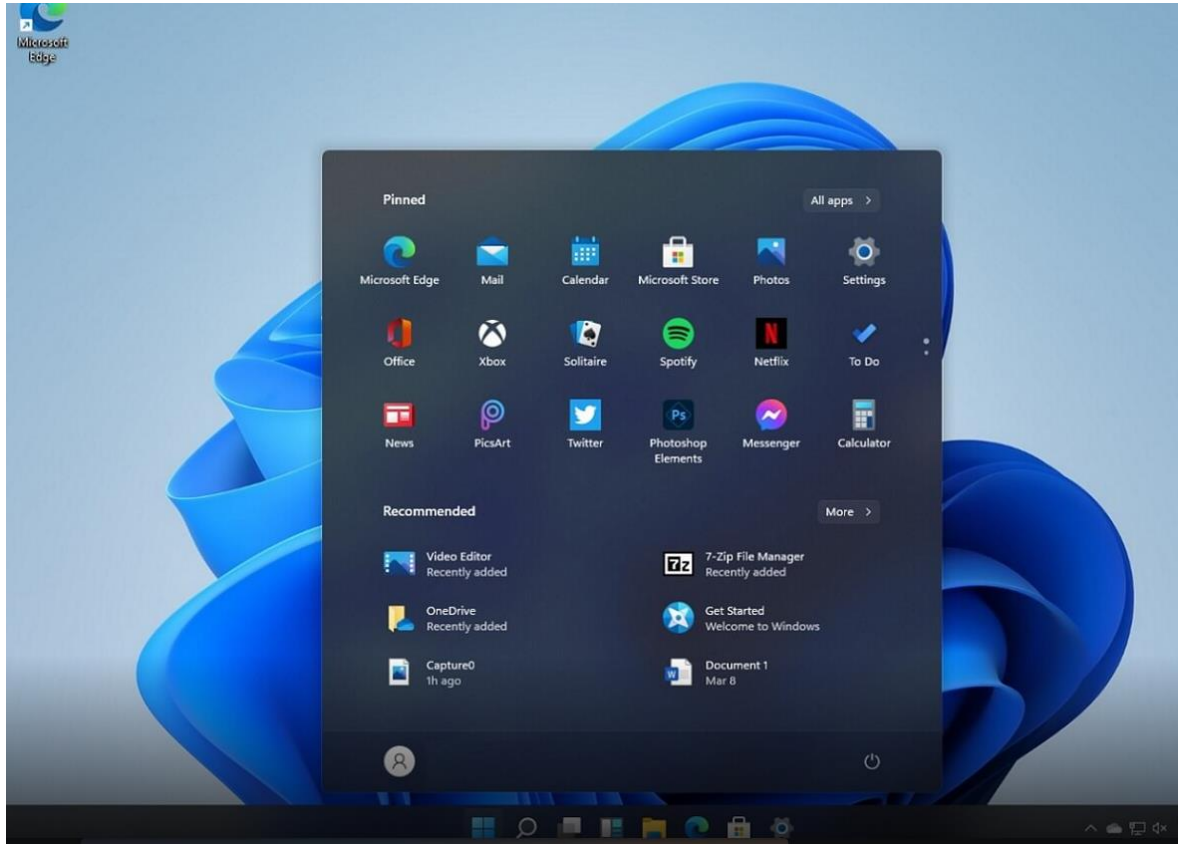

NOTE: The PIN requirements are SIX (6) digits long. All numbers cannot start with 0, and you should avoid using your birthday or SSN.

If you get an error, please contact ithelpdesk@bluetooth.com

Step 11.

Welcome to your desktop screen.

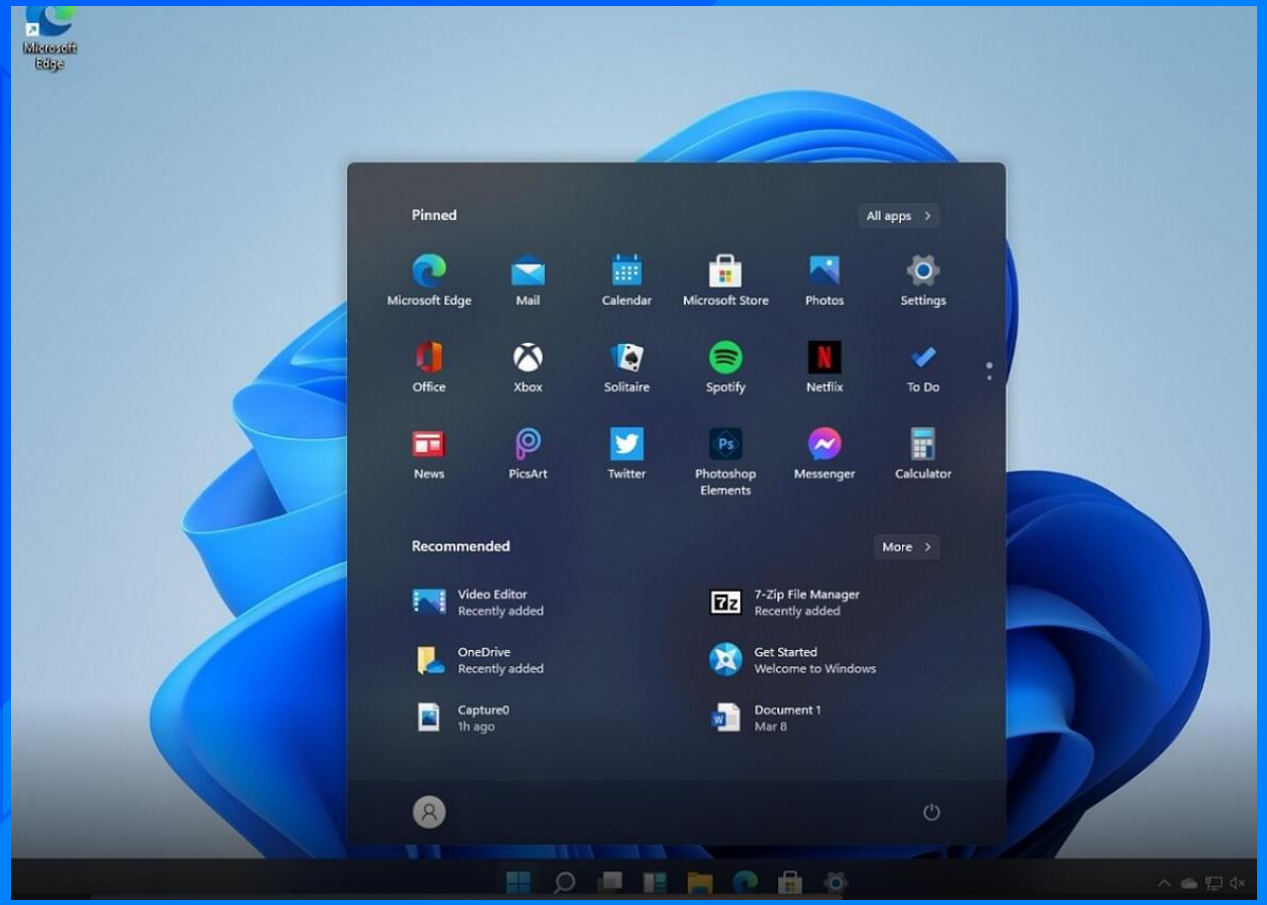

Please reboot your Laptop

Welcome to your desktop screen.

At this point, M365 apps (Outlook, Teams, MS Word, MS Excel) should be ready to use, and you can start communicating with your Manager or Team Member(s).

Other software applications will continue to download and install in the background and It could take up to 30 minutes to 1 hour.

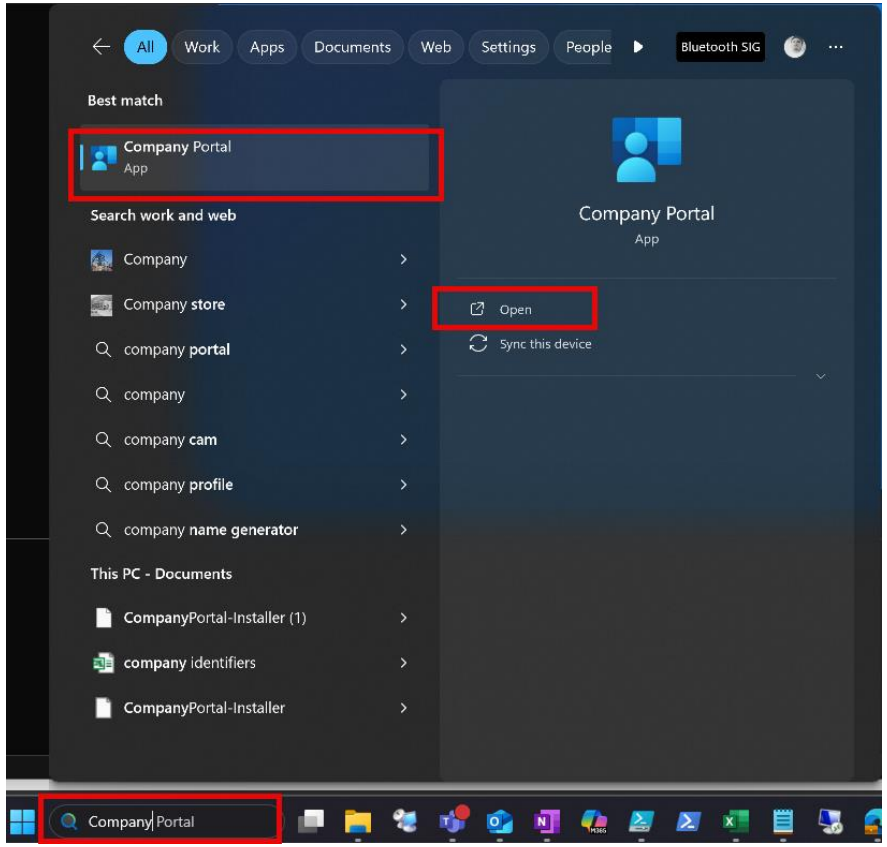

Company Portal

The company portal must be connected to receive Bluetooth and SIG applications.

Please verify if you have the company portal installed; if so, please launch the app.

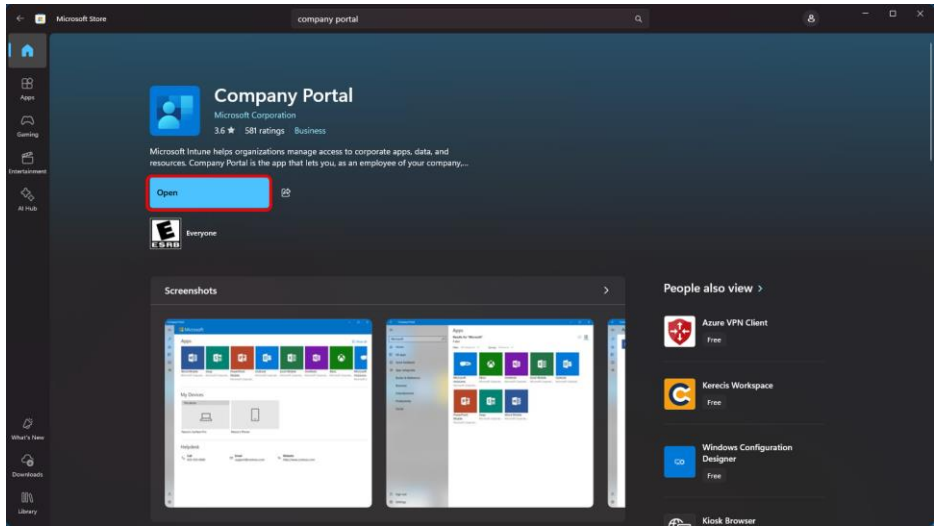

How to verify if the company portal is installed;
* In the search box on your desktop screen, Type “Company Portal” and select it from the lists to launch.

Company Portal

Suppose the Company Portal App is not installed. Try the steps below:

1. Open the Microsoft Store app, search for “Company Portal app,” and Install it. After Installing It, click on “open” to launch it.

If you need to install more applications on your laptop, please confirm that the app is available on the company portal and install it there.

* If the application you need is not available in the company portal, please email ithelpdesk@bluetooth.com with the name of the application.

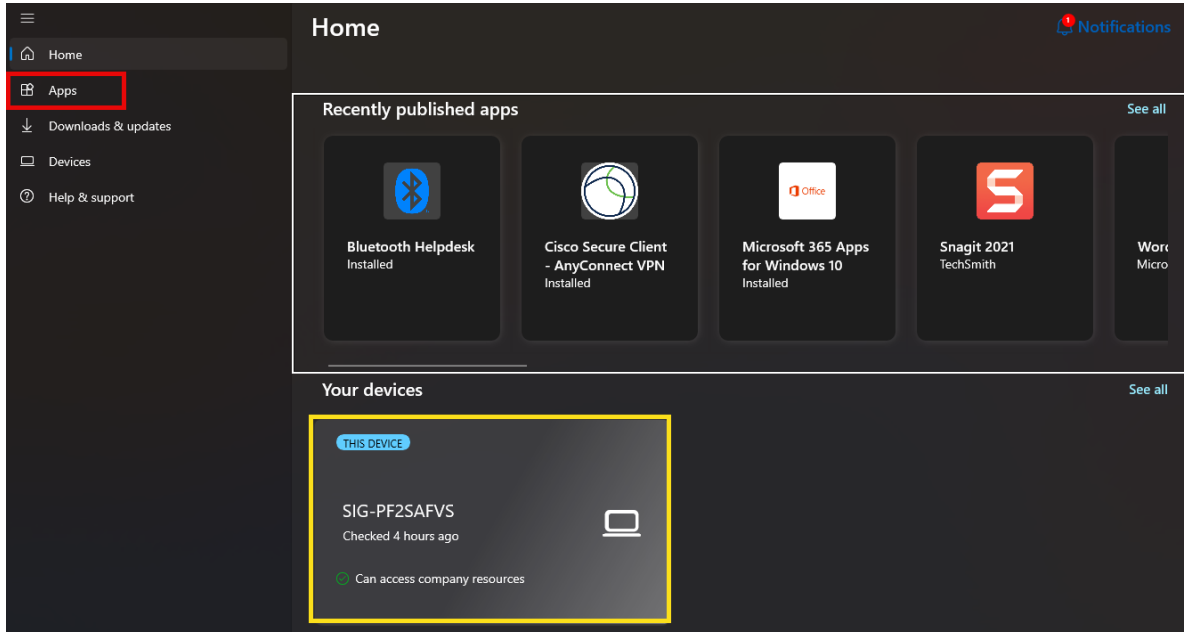

How to install apps from the company portal:

1. In the search box on your screen, Type “Company Portal” and select it from the lists to launch.

2. Click on Apps, select the Apps you need, and click Install.

Company Portal Cont.…

If you launch the Company portal and see “**can access company resources**,” your device is synced and ready.

****Note:****

You may see a message that says, **“Cannot access company resources.”** Click on it to receive information on what else needs to be completed. However, this will not prevent you from installing applications or continuing your work. Please contact your onboarding IT specialist for assistance or email **ithelpdesk@bluetooth.com**.

Company Portal Troubleshooting

If you see this statement, “This device hasn`t been set up for corporate use yet. Select this message to begin setup.” - Click on the statement to continue.

* Next screen, you will see “**Set up your device** screen” - **Click Next**

* On the next screen, you will see “**Connect to work.**” Click **Connect** and enter your @bluetooth.com email address and password for authentication.

* On the next screen, you will see “**Hold on while we register this device with your company and apply policy**.” **Please wait**.

* On the next screen, you will see “**Setting up your device**. It will take a few minutes to connect to your school or workplace”- **Click on Got it**.

* On the next screen, you will see “ a Green check mark— **Your device is now connected to work**!” Click Next to continue.

* On the next screen, you will see “You`re all set.”

Green Check Mark:
1. Add a corporate account to this device
2. Connect this device to work.

Click on **Done**.
