SKILLS

Documentation

- Technical & procedural documentation
- Workflows, SOPs & work instructions
- Knowledge capture from engineers & SMEs
- Training materials
- Writing for technical & partner audiences
- Structured authoring

Knowledge Infrastructure

- Information architecture & folder hierarchy
- Naming conventions
- Content inventory & cleanup
- Document lifecycle management
- Style guides, templates & terminology
- Version control, single-sourcing, content reuse

Intake & Delivery

- Change request intake & review
- Multi-stakeholder prioritization
- Concurrent publication cycles
- Defining new processes

Tools

- Confluence · Jira
- SharePoint · Livelink · Arena
- Microsoft Office · Adobe Acrobat
- Claude · Claude Code (AI-augmented authoring & document automation)

EDUCATION

Bachelor of Arts, Journalism

University of Nevada, Las Vegas

SUMMARY

Senior Technical Writer with 8+ years turning engineering and SME knowledge into operational procedures, workflows, specifications, user guides, and training materials for software, hardware, and industrial systems. Builds the infrastructure that keeps documentation accurate and findable: style guides, templates, folder hierarchies, naming conventions, version control, and change request intake. Experienced restructuring fragmented content repositories, delivering for multiple stakeholder teams at once, and using AI tools to scale authoring and document production.

EXPERIENCE

Technical Writer

Puget Sound Energy (PSE), Bothell, WA · *03/2026 – Present*

- Write and maintain operational procedures and workflows for the Wildfire Risk Management (WRM) program from concept to publication, capturing input from engineers, SMEs, and program leadership.
- Built the WRM team's document management framework from scratch, including a style guide, templates, review checklists, change request forms, version control, and tracking spreadsheets.
- Implemented a standardized change request process that takes document requests from intake through review, approval, and publication.
- Leading cleanup and governance of three team SharePoint libraries: designed a folder hierarchy, naming conventions, and a phased cleanup plan built on a team-wide content inventory.
- Manage the full document lifecycle: drafting, SME review, revisions, approval, publication, version control, and ongoing updates.
- Lead multi-document publication cycles that keep interdependent procedures aligned and give the program a single source of truth.
- Coordinate input from engineers, SMEs, program managers, and executive reviewers, protecting SME time by handling the writing, formatting, and coordination work.
- Use Claude and Claude Code to scale output, including scripted generation of branded Word templates and fillable PDF forms.

Technical Editor

Bluetooth SIG, Kirkland, WA · *06/2025 – 03/2026 · 9-month contract*

- Prepared, updated, and published partner-facing specifications, user guides, and manuals for a global audience.
- Applied templates, style guides, and checklists, and edited for grammar, terminology, and style, to keep documentation consistent across a multi-document portfolio.
- Managed change requests end to end, coordinating updates and delivery with cross-functional stakeholders.
- Maintained version control and tracking sheets to keep concurrent publications on schedule.
- Ran peer review cycles with SMEs and fellow writers to improve accuracy and readability.

Senior Technical Writer

Parsons, Las Vegas, NV · *06/2024 – 05/2025*

- Wrote and edited specifications, engineering design standards, SOPs, and training materials for hardware and systems projects.
- Worked with engineering teams and SMEs to develop and refine standard operating procedures.
- Organized and maintained a centralized documentation repository across a multi-project portfolio.
- Tightened version control to reduce errors, duplication, and version drift across concurrent updates.
- Rolled out standard terminology and style across documentation using a controlled style guide.

Technical Writer

Lithion Battery, Henderson, NV · *10/2022 – 06/2024*

- Built the company's first formal document management framework, introducing templates, a style guide, tracking spreadsheets, and version control that became the standard for ongoing work.
- Maintained the central documentation repository, improving accessibility, version control, and discoverability across teams.
- Worked with developers and SMEs to produce user manuals, installation guides, and release notes for battery hardware and software.
- Researched technical specs and product behavior to produce accurate, user-focused documentation.
- Worked hands-on with the hardware and software so documentation reflected how the products actually behaved.
- Produced visual aids, illustrations, and diagrams to clarify complex hardware and software workflows.

Technical Writer

Arcata Associates, Inc., Las Vegas, NV · *01/2020 – 10/2022*

- Wrote and edited manuals, proposals, contract deliverables, work instructions, checklists, policies, procedures, and statements of work.
- Worked with engineers across multiple projects to deliver publication-ready technical documentation.
- Advised on graphics, quality, format, and style for partner-facing and internal documentation.

Lead Content Developer

Rebel Media Group, Las Vegas, NV · *09/2018 – 01/2020*

- Built and managed social media content strategies aligned to client brand goals and target audiences.
- Produced and published interactive content across multiple platforms while keeping brand voice consistent.
- Led and mentored a team of content strategists, managing editorial calendars and delivery timelines.
- Analyzed performance data and consumer trends to guide content optimization and audience growth.
